Re: Cover Plate for Front Crankshaft Main Bearing  
on Two-Cylinder Motorcycles.

Dear Sirs,

According to our policy of continuous improvement a new front bearing cover plate of duraluminium has become standard feature, commencing with the following frame numbers:

637 655 ( R 50 )  
626 681 ( R 60 )  
658 629 ( R 69 S ).

The former cover plate was a gray-cast iron type. By choosing this material a perfect fit is ensured in the crankcase at any engine temperatures.

The Part No.: 00 02 034 remains unchanged.

With friendly greetings  
BAYERISCHE MOTOREN WERKE  
Aktiengesellschaft

i.V. Schaab i.V. Makowitzki
